The first of its kind in France, the Vanoise National Park was established in 1963. A vast territory where flora, fauna and a rocky mineral world are all preserved. Between the Maurienne and Tarentaise valleys, its borders meet the Gran Paradiso massif in Italy forming the largest nature reserve in Europe. At the centre of this mountain range lays the icecap of the Dômes de la Vanoise, extending over twenty kilometres. This journey, at the heart of the park, takes a route via high mountain passes which connect Aussois, Pralognan and the Haute Maurienne. Trails at high altitude in a fragile mineral world, through vast mountain pastures of the Vanoise where dry-stone buildings punctuate this beautiful route.

You will love

- The wild and protected area of the first National Park in France
- A route over high mountain passes along glacier of Dômes de la Vanoise
- A great variety of landscapes between Maurienne and Tarentaise valleys
- 6 days of total immersion
